Press Release

M&M +MVML operating PAT up 16%

Mumbai, 7th February 2012: The Board of Directors of Mahindra and Mahindra Limited today announced the unaudited financial results for the quarter ended 31st December 2011 for the company.

Mahindra Vehicle Manufacturers Limited (MVML), located at Chakan near Pune, was set up as a 100% subsidiary of the company with a view to sourcing contemporary products for expanding the market offerings of the company. Hence it is a critical part of its business and only the combined results of the company and MVML will provide a comprehensive view of company's performance.

Q3 F2012 – M&M + MVML results

The combined Gross Revenues and Other Income of M&M and MVML for the quarter ended 31st December 2011 is **Rs. 9011.2 crore** as against Rs. 6728.6 crore during the corresponding period last year – **a growth of 33.9%**. In Q3 last year, M&M Ltd. had an exceptional profit of Rs 117.5 crores arising from the sale of its holdings in Owens Corning India Limited. Excluding this exceptional item of last year, profit after tax during the current quarter of **Rs 705.9 crore** compared very favourably with Rs 608.5 crore in Q3 F2011 – **a growth of 16.0%**. **The Operating Margin for the combined entity in the current quarter is 13.8%.**

Q3 F2012 – M&M Standalone results

The Gross Revenues and Other Income of Mahindra & Mahindra Ltd. for the quarter ended 31st December 2011 is **Rs. 8978.7 crore** as against Rs. 6684.0 crore during the corresponding period last year – **a growth of 34.3%**. Excluding the impact of the sale of Owens Corning Shares last year, PAT for the current quarter is **Rs.662.2 crore** against a PAT of Rs 617.2 crore in Q3 last year – **a growth of 7.3%**. The Operating Margin during the current quarter is 12.2%. The growth in the profits of the company despite the relentless increase in material costs is due to a good volume performance by both Vehicles and Tractors in a difficult market and tight control on expenses. Once again it is stressed that the only meaningful figures for PAT and OPM are those of the combined entity M&M + MVML provided above.

In the Passenger Utility Vehicle segment, the company, with sales of 51702 vehicles in the current quarter, registered a growth of 22.9% over Q3 last year as compared to an industry growth of 18.4% and thus maintained its dominant position with a market share of 57.8%. All products in the company's UV portfolio did well in the quarter. In the Passenger MPV VAN segment, company's Gio compact cab and Maxximo Mini Van together recorded a volume of 6629 nos. with a market share of 13.4%. SAARC, South American & South African markets continued to extend healthy support to company's products.

The domestic tractor industry showed a moderate growth in the current quarter with sales growing by 12.7% over Q3 last year. The company's performance during the quarter with domestic sales of 62342 tractors under the *Mahindra & Swaraj* brands and a sales growth of 12.0% over the Q3 last year matched that of the industry. The engine business revenue grew by 14.1% to Rs. 200.1 Crore in Q3 F2012 against Rs. 175.4 Crore for Q3 last year.

YTD F2012 – M&M Standalone Results

Group Consolidated Results

The Board meeting to approve the Q3 F2012 accounts of a few major subsidiaries is still to be held. After the approval and announcement of their results, the company will separately release the information on Consolidated Group Turnover and PAT.

Outlook:

The current year to date, with global macro risks particularly in the oil markets, has been a challenging one. The country's economic growth, as a consequence, moderated significantly, and the year's GDP is expected to grow by only 7.1%. As per IIP data, during April- December 2011 industrial production grew by just 3.8%. There are, however, some positive economic signals on the horizon at the moment. The recent positive economic news flow from the US and the long term refinancing operations announced by the European Central Bank in December has helped calm global financial markets. Portfolio flows to India, as a consequence, have picked up considerably in recent weeks, easing pressures on the balance of payments and the exchange rate. Also, domestic inflation, while still high, has begun trending down, raising hopes of a decline in interest rates. The Company has always met challenges through its continuous focus on new product introductions which have helped it drive volumes. However, in the near future, it is expected that margins will continue to be under pressure.
