III. Other information:

1. *Reasons of loss or inadequate profits:* During the financial year 2010-11 ended September 30, 2011, the turnover and profitability of the Company has declined, mainly due to:-
- (a) the demerger of the Steam Turbine Business w.e.f. October 01, 2010, lower exceptional income, and significant losses in sugar operations.
- (b) The sugar is a cyclical business and is largely dependant on climatic factors, supply-demand position and government policies, including sugarcane pricing. High sugar production in the country results in softening of sugar pricing, which in turn adversely affects the profitability of the sugar mills. Conversely, lower production results in strong sugar prices, leading to better profitability in the sugar operations.
2. *Steps taken or proposed to be taken for improvement:* The Company has been taking various initiatives of cane development and steps to improve the operational efficiencies to lower cost of production of sugar. With a view to make its sugar operations more viable, the Company has chalked out an ambitious road map with cane development targets and to increase profitability of related businesses, such as, cogeneration and distillery operations. The engineering businesses are poised for rapid growth in the domestic as well as in the overseas markets, and in future, they are expected to largely offset the impact of the cyclicity in the sugar operations. Further, the Company is also looking at new opportunities to grow its business.
3. *Expected increase in productivity and profits in measurable terms:* In view of the facts stated at 1(b) above, it is difficult to forecast the productivity and profitability in measurable terms. However, the Company expects that the productivity and profitability may improve and would be comparable with the industry average.

IV. Disclosures:
